CONTENTS

Volume 55, Issue Nos. 1–12 (2007)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, 10 September

Optimal convergence properties of the FETI domain decomposition method: Y. Maday and F. Magoulès 1

Parallel solution of lifting rotors in hover and forward flight: C. B. Allen 15

Parallel CFD fire modelling on office PCs with dynamic load balancing: A. J. Grandison, E. R. Galea, M. K. Patel and J. Ewer 29

A multi-energy-level lattice Boltzmann model for the compressible Navier–Stokes equations: G. Yan, J. Zhang, Y. Liu and Y. Dong 41

A model of the unsteady response of a backward-facing compliant step: A. G. Gerber, A. G. L. Holloway and C. Ng 57

Solution of depth-averaged tidal currents in Persian Gulf on unstructured overlapping finite volumes: S.-R. Sabbagh-Yazdi, M. Zounemat-Kermani and A. Kermani 81

Issue No. 2, 20 September

Three-dimensional immersed boundary conditions for moving solids in the lattice-Boltzmann method: O. E. Strack and B. K. Cook 103

Semi-Lagrangian advection on a spherical geodesic grid: M. F. Carfora 127

An optimizing reduced order FDS for the tropical Pacific Ocean reduced gravity model: Z. Luo, J. Chen, J. Zhu, R. Wang and I. M. Navon 143

An optimized Schwarz method with two-sided Robin transmission conditions for the Helmholtz equation: M. J. Gander, L. Halpern and F. Magoulès 163

Development of a hybrid finite volume/element solver for incompressible flows: S. Tu and S. Aliabadi 177

Issue No. 3, 30 September

Acoustic upwinding for sub- and super-sonic turbulent channel flow at low Reynolds number: H. C. de Lange 205

A new algorithm for surface tension model in moving particle methods: S. Zhang, K. Morita, K. Fukuda and N. Shirakawa 225

Numbering techniques for preconditioners in iterative solvers for compressible flows: B. Pollul and A. Reusken 241

Computations of flow over a flexible plate using the hybrid Cartesian/immersed boundary method: S. Shin, S. Y. Bae, I. C. Kim, Y. J. Kim and J. S. Goo 263

Adapting simulation codes to compute unstable solutions and bifurcation behaviour: B. B. Grande, S. J. Tavener and J. W. Thomas 283

Issue No. 4, 10 October

A modification of the artificial compressibility algorithm with improved convergence characteristics: F. Muldoon and S. Acharya 307

Optimal flow control for Navier–Stokes equations: Drag minimization: L. Dedè 347

Development of a local MQ-DQ-based stencil adaptive method and its application to solve incompressible Navier–Stokes equations: C. Shu, Y. Y. Shan and N. Qin 367

The (9,5) HOC formulation for the transient Navier–Stokes equations in primitive variable: J. C. Kalita and S. Sen 387

Issue No. 5, 20 October

Simulations of the turbulent channel flow at Re_τ = 180 with projection-based finite element variational multiscale methods: V. John and M. Roland 407

Solution of the 2-D shallow water equations with source terms in surface elevation splitting form: D.-J. Ma, D.-J. Sun and X.-Y. Yin 431

Multi-resolution implicit large eddy simulations using a high-order overset-grid approach: S. E. Sherer and M. R. Visbal 455

Efficient high-resolution relaxation schemes for hyperbolic systems of conservation laws: R. Kumar and M. K. Kadalbajoo 483

Issue No. 6, 30 October

BILU implicit multiblock Euler/Navier–Stokes simulation for rotor tip vortex and wake convection: B. Zhong, S. Shaw and N. Qin 509

Critical evaluation of CFD codes for interfacial simulation of bubble-train flow in a narrow channel: F. Özkan, M. Wörner, A. Wenka and H. S. Soyhan 537

A continuous second-order sensitivity equation method for time-dependent incompressible laminar flows: F. Ilinca, D. Pelletier and J. Borggaard 565

A comparative study of inflow conditions for two- and three-dimensional spatially developing mixing layers using large eddy simulation: W. A. McMullan, S. Gao and C. M. Coats 589

Issue No. 7, 10 November

Efficient solution techniques for implicit finite element schemes with flux limiters: M. Möller 611

Temporal accuracy analysis of phase change convection simulations using the JFNK-SIMPLE algorithm: K. J. Evans and D. A. Knoll 637

Modelling the effects of emergent vegetation on an open-channel flow using a lattice model: F. J. Jiménez-Hornero, J. V. Giráldez, A. M. Laguna, S. J. Bennett and C. V. Alonso 655

Lattice Boltzmann methods for shallow water flow applications: G. Thömmes, M. Seaïd and M. K. Banda 673

Adaptive VOF with curvature-based refinement: M. Malik, E. S.-C. Fan and M. Bussmann 693

Issue No. 8, 20 November

Dynamics of Jovian atmospheres with applications of nonlinear singular vector method: Z. Zhang and J. Lin 713

Instabilities during batch sedimentation in geometries containing obstacles: A numerical and experimental study: R. R. Rao, L. A. Mondy and S. A. Altobelli 723

A modified conservation principles theory leading to an optimal Galerkin CFD algorithm: S. Sahu and A. J. Baker 737

A simple axisymmetric extension to virtual cell embedding: J. Tang 785

Analysis of a discontinuous Galerkin approximation of the Stokes problem based on an artificial compressibility flux: D. A. Di Pietro 793

Issue No. 9, 30 November

Fifth-order Hermitian schemes for computational linear aeroacoustics: G. Capdeville ... 815

Coupled ghost fluid/two-phase level set method for curvilinear body-fitted grids: J. Huang, P. M. Carrica and F. Stern 867

A physically based flux limiter for QUICK calculations of advective scalar transport: Q. Qian, H. G. Stefan and V. R. Voller 899

Issue No. 10, 10 December

High-order ENO and WENO schemes for unstructured grids: W. R. Wolf and J. L. F. Azevedo 917

Parallel numerical simulation for the coupled problem of continuous flow electrophoresis: M. Chau, P. Spiteri and H. C. Boisson 945

Numerical simulation of two-dimensional laminar slot-jet impingement flows confined by a parallel wall: A. Sivasamy, V. Selladurai and P. Rajesh Kanna 965

Direct simulation of two-dimensional turbulent flow over a surface-mounted obstacle: V. P. Fragos, S. P. Psychoudaki and N. A. Malamataris 985

Issue No. 11, 20 December

An explicit formulation for the evolution of nonlinear surface waves interacting with a submerged body: C. P. Kent and W. Choi 1019

Numerical aspects of improvement of the unsteady pipe flow equations: R. Szymkiewicz and M. Mitosek 1039

Kinetic meshless method for compressible flows: C. Praveen and S. M. Deshpande ... 1059

On the effects of a compressible viscous lubricant on the load-bearing capacity of a journal bearing: P. C. Bollada and T. N. Phillips 1091

Issue No. 12, 30 December

On the selective local stabilization of the mixed Q1–P0 element: J. Qin and S. Zhang 1121

The dispersal processes within the tide-modulated Changjiang River plume, China: L.-F. Lu and J. Z. Shi 1143

Viscous dissipative fluid flow past a semi-infinite vertical plate with variable surface temperature: G. Palani 1157

Hopping numerical approximations of the hyperbolic equation: P. Tkalich 1171

An improved hybrid Cartesian/immersed boundary method for fluid–solid flows: T. Gao, Y.-H. Tseng and X.-Y. Lu 1189
